

I'm really concerned about the change for the Low Power FM broadcasting. I am a listener of K-Love and can not imagine losing that opportunity. K-love is encouraging, helpful, and a refreshing change to all the other radio stations that we are bombarded with daily. K-love gives people an opportunity to hear a positive message instead of the garbage other radio stations play. I don't have to worry about inappropriate language and discussions on it that I do have to worry about with almost all other stations. I often question whether the other stations are just getting away with what they are playing, or if that is actually allowed.

One of the problems in this country is the things that we have started allowing to enter our thoughts. Everyone wants to push the edge and get a little closer to that line. K-love tries to keep far away from that edge and halt our "progress". Most of the people that I know are as concerned about this "progression" as I am. We've allowed Hollywood and "shock jocks" to dictate what is acceptable for far too long. Please don't make any decisions that will hurt one of the few public opportunities we have to bring this country back to morality and stop the slide into a totally immoral society.
